Addresses on Social Credit System Arouse Keen Interest

Present Methods of Finance Exploit People and Rob Them of Purchasing Power, is Claim of Speakers

About 300 people attended the meeting held under the auspices of the Men's Brotherhood in the Community hall on Tuesday evening. They were keenly interested in the addresses of Mrs. W. W. Rogers and Mr. J. Unwin on the Douglas System of Social Credit. Mayor Paterson was chairman.

Mrs. Rogers introduced the subject by giving a brief review of the history of the development of the monetary system from the ancient times of barter. Mr. Unwin went fully into the details of the proposed system whereby social credit would be established and a living assured for everyone, free from taxation.

The plan would provide a basic dividend of approximately \$30 per month, and he pictured everyone finding a little goblin on their pillow, when waking in the morning, with this monthly dividend cheque. But it must be spent, it must not be hoarded, for the success of the Douglas plan depends on the continual flow of credit, not damming it up as is done by the bankers under the existing system of finance.

Prominent men were not interested in this scheme, for it would take from them the powers they now possessed of controlling public credit. The three great banks, the Montreal, Commerce and Royal were cited as controlling the bulk of credit in Canada, and the directors of these banks held 992 directorships in Canadian industries, thereby controlling the credit of those concerns, and through them controlling the credit of all who worked for them.

The people were being exploited. Under the Douglas plan it was proposed to restore the monopoly of credit to the people to whom it rightly belonged. The people were being exploited to such an extent that their credit was being pledged and the debts incurred were being passed on to coming generations. It was a scandalous system, but under the plan proposed the debts of the present generation would be paid by them.

Even the press would not tell the truth, for it was controlled by the big interests. Social credit alone gives value to property; financial credit does not move goods, stated Mr. Unwin, and the wealthy will be taxed to provide for the unemployed.

He cited the town of Raymond as an instance of the partial working of social credit. When they commenced their plan of stamps credit two years ago they owed the bank \$52,000; to-day they have reduced it to \$15,000, and the banks were quite mad about it, because it had been demonstrated that if people got together and worked out their own plan of credit, they could get along without the banks. Social credit puts purchasing power in the hands of the people: our present system of exploitation robs them of purchasing power by withholding credit.

By means of a chart Mr. Unwin showed the method of keeping credit flowing, so that hoarding or cessation of credit would be prevented.

During the intervals selections were played by Mrs. Clifford, pianist, and Mr. W. J. Harris, violin. A collection was taken to defray expenses of the speakers, who are conducting an educational campaign financed only by the money received through collections.

An Opportunity Missed for Developing Goodwill

Two meetings called to arrange for the celebration of Dominion Day by holding a sports program aroused so little interest that the proposal has been abandoned. This decision was arrived at on Monday evening, when the second meeting was called on Friday evening the following met in the council chamber: B. M. Hall, representing the softball league; Jim Anderson, Robert Hill, J. Park, D. Neave, J. Poxton, Alex. Balloch, J. Wilson, representing the football club; Alex. Easton representing the band; O. E. S. Whitehead and H. T. Halliwell, representing the Board of Trade.

H. T. Halliwell reported he had interviewed the hotel proprietors, who had agreed to donate \$15 each, and Mr. Whitehead stated on behalf of the International Coal Co. that if a celebration was to be held, he would donate the same as last year, \$100. McGillivray Co. intimated they would donate a similar sum.

The financial statement of 1933 was read and placed on the table, giving full particulars of revenue and disbursements. As secretary of last year's committee, Mr. Halliwell stated that he had tried to interest the business men and the union in organizing a celebration, as it was the only day of the year when the entire community could join in an occasion of this nature, it being a national holiday. The union had been invited to appoint a committee to co-operate with the town, and announcement of the meeting had been circulated among the business men.

In view of the fact that none of the merchants were present, and there were not sufficient to organize committees, the following motion was passed:

That a meeting be called on Monday, June 18, at 7 p. m. in the council chamber to further consider plans for July 2 celebration. Moved by Hill and Easton.

On Monday evening at the appointed time there were present W. Cousins, representing the baseball clubs; Wm. Bell, J. Lysek, Alex. Balloch and H. T. Halliwell.

After waiting half an hour, no further people coming to the meeting, it was decided to abandon any further effort this year. The union was not represented.

Numbers on Relief

Throughout the entire province of Alberta, 55,082 people were listed as recipients of relief as at June 1st. This year compared to a total of 52,851 men, women and children shown on the relief lists as at the same time in 1933. This is an increase of 2,231. The 1934 total when split up shows 26,702 on relief in the cities, 26,500 in the rural municipalities and outlying districts, and 1,880 single men cared for in relief kitchens and camps.

ST. PAUL'S UNITED CHURCH

The Sacrament of the Lord's Supper will be administered Sunday morning, June 24. The minister and session are anxious that this service should be well attended. A communion meditation will be given by the minister.

At the evening worship the minister will take as his sermon subject "Jacob at Peniel."

Do not forget the Sunday School picnic on Saturday at 2.30 p. m. Parents and children of the United Church Sunday school are cordially invited. The children are asked to bring something for a picnic lunch. A good time is assured.

A. P. Burpee, C. P. R. Calgary, was a business visitor at the local office on Tuesday.

Boy Scout Flag Day June 30

Coleman Boy Scouts will sell flags on June 30 to raise funds for local purposes and for their summer camp at Waterton Lake. Boy Scout influence is recognized in many countries of the world as very beneficial in promoting ideals of citizenship and in doing good to others. It is maintained largely by public support. Coleman people are asked to support the boys and buy a flag.

Coleman committee of the Boy Scout Association is comprised of O. E. S. Whitehead, H. C. McBurney, Rev. A. S. Parlington, H. T. Halliwell and Reg. Jones.

School Board Meeting

The board met on Monday, June 18, and contracts for re-engagement of the present staff were ratified, with the same salary basis as the past year. Several schedule increases go into effect on the public schools staff under the terms of the original engagement of teachers.

The date of re-opening following midsummer holidays was set for Aug. 27. The purchase of various supplies was considered.

Bowes is Grand Master

Vic Bowes, well known assistant district passenger agent of the C. P. R., Calgary, was elected grand master of Masonic Grand Lodge of Alberta at its annual meeting in Edmonton. Mr. Bowes is well known throughout the Pass, which he frequently visits in the course of his duties, and his election will prove popular with the Masonic fraternity throughout the Province.

Local News

Mr. and Mrs. A. Wilson of Drimnien, Alta. are the guests of Mr. and Mrs. M. Wilson.

Mrs. Charlie Smith of Bowden, Alta., is spending a few weeks with Mrs. P. Smith.

C. J. Devine, M. W. Cooke, H. W. Clark and P. Rinaldi, went out to the North Fork the first day of the fishing season and caught a few. The water was too muddy for good fishing. W. J. Bartlett and W. A. Vaughan made a trip out to the Racehorse Creek during the afternoon and had a pleasant outing.

A. L. Watkins, who has been spending his holidays here, received word on Saturday of his appointment as manager of the government liquor store at High River, where a vote was recently taken on the establishment of a store, and which carried by a heavy majority. Mr. Watkins was formerly manager here, being transferred to Edmonton last year. He brought his visit here to an abrupt end by leaving for Edmonton to make arrangements for moving his household as soon as possible.

Barbers Rules and Regulations for the Town of Coleman

Barbers' shops open for business at 8 a. m., close at 7 p. m.

On Saturday nights the shops may remain open until midnight. Wednesday afternoons shops close at 1 p. m.

On Dominion and town holidays shops will remain closed in accordance with rules governing all other places of business.

The undersigned local barbers agree to operate according to the rules and regulations above mentioned.

Signed: Frank G. Graham, J. H. Gray, W. Eitelheim, C. Huffman, J. Mielicky.

Discussing Franchise Revision

Mayor Pattinson, Councillors F. Antolov and W. Chapman, and James Ford, secretary, are at Lethbridge to-day to appear before the Board of Utility Commissioners in connection with the revision of the franchise between the town and Coleman Light & Water Co. Ltd. O. E. S. Whitehead and H. V. Humphreys are representing the company.

Herb Ott relieved the boys of \$104 in the recent Baer-Camera fight. When asked how he felt towards his winnings, he replied with a smile "It's a gift."

Nothing But Abuse

Alderman Snerton, of Lethbridge city council, Labor representative, plainly tells the "Reds" that the reason he will not accept an invitation to appear on their platform is that "he has been denounced as a labor fakir, traitor, parasite and other pleasant epithets which the orators who have up to the present adorned your platforms are so fond of using to all who venture to disagree with them or who refuse to take dictation from the Communist party."

Lethbridge is experiencing a similar vituperative campaign as in the Pass in 1932, and the same methods are followed with parrot like repetition wherever the Reds inflame the public mind.

School Teachers in Politics

An interesting feature of the Saskatchewan elections is that the three party leaders are or have been school teachers.

James G. Gardiner, the newly elected premier, in his early days in the west, taught school north of Weyburn and played on the football team. The defeated premier, Dr. J. T. M. Anderson, has to his credit splendid work as a school teacher and later inspector among the "new Canadians" as he termed the immigrant people from Europe among whom he taught school.

M. J. Coldwell, the leader of the C.C.F. forces, has been a Regina school teacher and principal for many years, originally coming from England.

W. F. Kerr, who will be minister of public works and telephones in the new Saskatchewan government, was one of the early editors of the Regina Leader, and many old friends will be pleased to see that he secured election.

Announcement is made this afternoon of the birth of a son to Mr. and Mrs. J. Plante.

Coleman Gains Victory Over Fernie—Score 1-0

Winning Goal Scored by Veteran Player Fred Beddington 20 Minutes From Start of Game

Crows Nest Pass league standings.
F W L D P
Kimberley 8 7 1 0 14
Corbin 8 6 2 0 12
Coleman 8 5 2 1 11
Coal Creek 8 4 4 0 8
Fernie 8 3 4 1 7
Michel 8 2 3 2 7
Hillcrest 8 2 5 0 6
Bellevee 8 2 5 1 5
Blainmore 8 1 7 0 2

Playing before a large crowd in Fernie on Sunday, Coleman defeated the Fernie club 1-0.

Both teams were evenly matched and play throughout was fairly even. Ford was the standout for Coleman pulling off some spectacular saves and earning the applause of the crowd on several occasions. Fernie played a better positional game than Coleman; several of the local players wandered out of position leaving their opponent wide open. To Beddington, playing his first game of the season, goes credit for putting home the winning goal and giving Coleman two points. Edwards, Coleman's new centre, was too closely watched by the Corrigans to show what he can really do. However when he did get a chance he showed tricky footwork and proved himself a hustler.

Play started at a fast clip with Fernie on the offensive. The first five minutes saw Ford save two hot ones and Bennett rattle the cross bar before Coleman cleared. Coleman worked their way down the field and Oakley was called upon to save several times. With a neat passing attack Coleman ganged up on the Fernie goal and Beddington booted the ball into the net from a few feet out after 20 minutes of play.

War Debt Revision Looms

Great Britain's action in deferring payment of the \$261,730,000 instalment due the United States on June 15, has thrown the whole war debt problem again prominently into the field of international controversy. It poses the United States government with the inescapable necessity of initiating discussions preliminary to a complete review of the war debt situation. It forces a showdown.

Great Britain, of course, will not be satisfied with a mere review. It wants revision of the terms of settlement—revision drastically downward. It wants as much consideration from its creditor, as it (a creditor) has given its debtors. At the very worst, it seeks as generous treatment, on principal and interest, as was given France and other countries by the United States.

In failing to make even a so-called "token" payment on the instalment due June 15, Great Britain informed the United States that the terms of the agreement between the two countries in respect of war debts imposed "a burden which was both unreasonable and inequitable in relation to other countries." The facts justify this statement. Whether intentionally or not, Britain has been adversely discriminated against.

Great Britain, according to the records, borrowed \$4,277,000,000 from the United States, a large percentage of which was not for its own use, but on behalf of allied countries during the war. The money was spent in the United States for war material and was the real foundation of the extremely high wages paid munition workers in that country during the war. Since the Baldwin agreement which fixed the terms and conditions of repaying the war loans, Great Britain has made instalment payments aggregating \$2,025,000,000. Because of the high comparative interest rate paid by Britain, however, London is still indebted to Washington in the sum of \$4,713,785,000. That is to say, after paying back more than two billion dollars, Britain still owes more than the original debt.

Obviously, the situation clamors for reasonable adjustment from that aspect alone. There are other, equally cogent, reasons why revision should be made. There are irrefutable arguments why the debt problem should be solved finally and amicably. That war debts should remain a subject of international controversy, cropping up periodically to stir prejudices and animosities, is a reflection upon the intelligence of the two great English-speaking nations towards whom the world looks for preservation of concord among the countries of the world.

Great Britain's agreement to pay instalments in the amount of approximately \$262,000,000 was predicated, in the first place, upon expectations of a similar amount being paid by France and other European countries in respect of war debts due London. Britain lent more than she borrowed. In order to avoid financial and economic chaos, however, the British government decided to suspend all claims against debt nations for payments on war debts, and takes the position now that, if it must pay the United States in full, it must exact payment of a corresponding amount from its own war debtors. The position is quite understandable—and undoubtedly reasonable.

"Such procedure," said the British note to Washington, "would throw a bombshell into the European arena which would have financial and economic repercussions over all five continents, and would postpone indefinitely the chances of world recovery."

Consequently, Britain politely suggests the United States should do its bit "to speed world recovery by recognizing the realities of the situation and revising present agreements on a payable basis."

The question is not that Great Britain is anxious to escape payment of its indebtedness. Suggestions have emanated from London, from time to time, for liquidation of the entire obligation by lump sum payment. Washington has not viewed this suggestion favorably, heretofore. In fact, an intransigent position has been taken by some of the most vocal of American legislators who take the "pound of flesh" viewpoint. Furthermore, Britain's failure to make even a payment on account—the "token" payments such as were made in June and December 1933—has been attributed to the Johnson Act, passed this year, which specified that any nation not making payment in full on the due date, would be considered as in default.

The British note is couched in language which the people of Western Canada will appreciate and approve. It strikes a manly note of independence and forthrightness. While the declaring payment would be deferred until "it becomes possible to discuss an ultimate settlement of inter-governmental war debts with a reasonable prospect of agreement" the note asserts the British government has no intentions of repudiating its obligations.

Japanese Trade Invasion

Now Penetrating Traditional United States Markets

Japan's steady successful invasion of traditional United States export markets was disclosed in the department of commerce annual world economic review for 1933. The report showed larger Japanese shipments of competitive articles to the United States, big export increases to Latin America, a Japanese victory over American manufacturers in the battle for the Philippine textile trade, and increasing sales in Europe, Africa and elsewhere.

Grandma was helping Peggy make out a list of little guests for her holiday party.

"How about the Morton twins?" grandma asked.

"Well, there's no need to ask them both," Peggy answered, "they're 'actly alike."

Few People Escape Attacks Of Summer Complaint

Summer Complaint may be slight, or it may be serious, but you can't tell when it seizes you how it may end.

Allow the profuse diarrhoea, the vomiting and purging to continue, for a day or two, and you may become weak and prostrated.

Just as soon as you feel any looseness of the bowels go at once to your drugstore and get a bottle of Dr. Fowler's Extract of Wild Strawberry and check this unusual action before the weakening looseness can get started.

Don't experiment. Get "Dr. Fowler's." It has been on the market for 89 years.

Making China Seas Safe

Marine Department Continues Work To Provide Guidance For Ships Typhoons do not tell the whole story of the China Seas. Fog may assail the shipping on the Chinese coast at almost any time, and storms independent of the typhoons are frequent. The coast itself is as dangerous and the sets of its tides as treacherous as any in the world. Casual islands and shoals demand the utmost vigilance, and the seamen who man Chinese junk boats are no masters of the ancient craft of navigation.

The lighting of the China coast is not a century old. The National Lighthouse Service was founded about the middle of the nineteenth century by Sir Robert Hart, who was authorized by the government of the day to start a system of lighting for the benefit of navigation. Sir Robert possessed himself of a few qualified experts, and he and his handful of foreigners established the nucleus of a service which, in the Chinese Maritime Customs, now provides guidance not only to ships at sea but to the countless craft navigating the rivers of China and in particular the Yangtze.

The romance of the Marine Department of the Chinese Maritime Customs has yet to be written. This organization, originated by Sir Robert Hart and his devoted helpers, has developed unobtrusively, and its traditions and efficiency have been maintained by successive Inspectors-General.

For the last five years or so bandits have waylaid the staff engaged in marking out channels for navigation. They have, however, been promptly restored—and have subjected the Customs launches to such assiduous malignance that those craft now have to be protected by metal plates and shut up like sardine tins. Near Amoy, the capital of Anhwei, there is a Christmas Island, a favorite spot for the bandits in the Lower Yangtze. Twelve robberies of lighthouses or lightboats occurred there in 1931.

Put the work proceeds, the course has been lately surveyed. Approved marks have been established and the River Inspectorate has added to its store of knowledge and given it to the river public in thousands of notices.

Flag Made By Prisoners

Union Jack Secretly Made In German Camp During War

Made in a German camp during the World War, a British Union Jack was used during the unveiling recently of a memorial in Manchester, England, says Betty Barclay, an Alton, who brought the flag home. It was made by prisoners in Sprottau, Silesia. "A Russian, who was allowed out," he said, "used to smuggle in a little bit of cloth at a time, and in the tailor's shop another Russian secretly made it up to the instructions of the British. We produced it first at the funeral of one of the British prisoners, and in all it was used on 21 such occasions. Only once did the Germans show any objection. The flag was drying on the wall, and when an inspecting general saw it he stopped, started, 'Shein-hund', and passed on. Each member of his staff did likewise."

Animals As Witnesses

Were Used In Sardinia Until Few Years Ago

Animals were used as court witnesses in Sardinia up to a few years ago. When a solitary householder killed an alleged burglar he was brought to trial and made to swear that the homicide was justifiable. The oath was taken before one of his dogs, cats or birds that witnessed the killing. If the animal did not manifest some contradictory sign the prisoner was set free.

Buried On Rifle Range

Col. John Hopton, a famous rifleman who is well known in Canada, has been buried in a coffin at Bisley, where he was killed in accordance with his expressed wish, at the firing point of the 1,500 yards range on his own estate, in Hertfordshire. He had competed at Bisley Empire meet for 36 years, mosquitoes.

Are Unknown Specimens

Three crane flies, collected by King Leopold of Belgium, were received at Amberley College for identification by Dr. Charles P. Alexander, professor of entomology. The flies, unknown specimens of Tipulidae, are long-legged and slender, resembling

Tennis became a sport more than 700 years ago, but in its beginning it was an indoor game and has been "lawn tennis" only since 1874.

Zoo Fatality

Lions In Cage Kill Victim As Horrified Spectators Watch

While a crowd of horrified spectators looked on, four lions in an open-air zoo at Whipsnade, Eng., killed a zoo employee who had gone into their pit to recover a visitor's hat.

The owner of the hat and several other persons who tried to save the victim, Stanley Lewis Stenson, were driven back by the lions, two of which were eventually killed by keepers before they could recover Stenson's body.

Stenson, employed in the calving department of the zoo, apparently decided suddenly to attempt to retrieve the hat and went into the enclosure between the outer barrier and the railing surrounding the pit in which the lions are kept.

As he crawled along the top of the inside railing two of the lions reached through the bars and began mauling him.

Stenson was unable to get away from the lions' claws and several spectators went into the place to try to pull him away, but were not successful as the two other lions joined in the attack through the bars.

Stenson then fell into the pit, striking his head on the concrete about 15 feet below. The lions dragged him further into the pit and killed him as the horrified spectators screamed and several women fainted.

The keepers had to shoot two of the lions before they were able to drive the others into their cages at the far end of the pit.

Recipes For This Week

(By Betty Barclay)

HOT MILK SPONGE CAKE

(8 eggs)

1 cup sifted cake flour

1 teaspoon combination baking powder

1/4 teaspoon salt

3 eggs

1 cup sugar

12 tablespoons lemon juice

6 tablespoons hot milk

Sift flour once, measure, add baking powder, salt, and sift together three times. Beat eggs until very thick and light and nearly white (10 minutes). Add sugar gradually, beating constantly. Add lemon juice.

Fold in flour, a small amount at a time. Add milk, mixing quickly until batter is smooth. Turn at once into ungreased tube pan and bake in moderate oven (350 degrees F.) 35 minutes, or until done. Remove from oven and invert pan 1 hour, or until cool.

This mixture may be baked in two lightly greased 8x8x2-inch pans in moderate oven (350 degrees F.) 25 minutes; or in 12x8x3 inch loaf pan in moderate oven (350 degrees F.) 20 minutes. Or turn mixture in 36 small cup cake pans, which have been greased very lightly on bottoms, and bake in moderate oven (350 degrees F.) 20 minutes, or until done.

PEANUT BUTTER HERMITS

1 cup sweetened condensed milk

6 tablespoons peanut butter

4 tablespoons salt

3/4 cup graham cracker crumbs

Thoroughly blend together the sweetened condensed milk and peanut butter. Add salt and graham cracker crumbs. Mix well. Drop by spoonfuls on a buttered baking sheet. Bake fifteen minutes, or until brown. Cool. Moderately hot oven (375 degrees F.). This recipe makes 1 1/2 dozen.

Girl Castaway—Good Heavens! Cannibals!

Sailor—Now, now, don't get in a stew.

THAT DEPRESSED FEELING IS LARGELY LIVER

Wake up your Liver Bile

—Without Calomel

You are "feeling punk" simply because your liver is sluggish and its bile fails to enter your bowels. Digestion and elimination become poisoned, and your entire system is affected.

When you need a liver stimulant, something that goes further than milk, mineral water, or coffee, take Carter's Little Liver Pills, which only move the bowels—liquor the liver.

Take Carter's Little Liver Pills, Purge regularity, and you will feel better. Ask for them by name. Refuse substitutes. See at all druggists.

Test Route To Arctic Posts

Hudson's Bay Company Plans To Ship Supplies From Edmonton Testing out the Mackenzie river route, the Hudson's Bay Company will ship 500 tons of supplies from Edmonton this season for its posts in the western Arctic region, according to Col. H. G. Reid, manager of the H.B. transport department for the north.

The shipments will be moved as early as possible down the Mackenzie river to Tuktoyaktuk harbor, on the Arctic coast, east of Aklavik.

At that point, the supplies will be loaded on a distributing vessel to be carried to posts in the Cambridge Bay, King William Island and other parts of the western Arctic.

It is planned to start the distributing vessel on this trip by August 1 so as to give it time to complete its Arctic voyage and return to port before freeze-up.

From the standpoint of Edmonton and the northern route, this year's experiments are of importance as successful results will mean that in future the supplies will be moved northward from this city.

Several years ago the steamer Bay-Chimo was frozen in and abandoned when carrying the season's supplies for northern posts round by way of the Pacific and Bering strait to the Arctic ocean.

This route was used successfully the next year, however, but last year there was another failure and supplies had to be rushed north by way of Edmonton and the Mackenzie river to Aklavik.

"The route from Vancouver through Bering strait is uncertain," said Col. Reid. "We think the Mackenzie river is more certain and for that reason are making this first experiment this year."

The difficulty of the Mackenzie route in the past had been to find a suitable trans-shipping point where the distributing vessel could meet the river boat, Col. Reid explained.

Due to sandbars at the mouth of the river, it obviously was difficult to bring a deep sea vessel into shallow water, while at the same time a river boat could not be navigated on the ocean.

Last year, the Dominion government had co-operated with the company in making a survey of the Mackenzie river delta. The reports of that survey gave reasonable prospects of Tuktoyaktuk harbor being a suitable point at which the vessel could meet.

Native Son Of Jutland

Danes Settling Up Memorial Stone To Shakespeare's Hamlet

The Danes of Jutland have made clear their position that they claim Shakespeare's hero Hamlet as a native son of Jutland—by setting up a memorial stone on the battlefield where he is said to have fallen. Some years ago a hotel-keeper in Elsinore, an eastern Danish town, labelled a local grave Hamlet's to the distress of Danes who knew their ancient history. Denmark's oldest historian, who lived about 1200 A.D., declared that Hamlet after being crowned King fell in battle on Ammelbø, or until killed. He was buried somewhere on the field.

The stone has been placed on a Viking mound in the field, though it is emphasized that the exact spot where the king was buried is entirely unknown. An excavation of the Viking mound failed to reveal any sign of burial. The inscription on the stone is translated as follows: "Amled, wisest of all in Viking days, playing the fool until the hour of revenge. Hailed as king by the Jutes, he rests on Ammel Hede."

Working To Lift Debt

Farmer Members In Prairie Town Show Loyalty To Church

An illustration of the grip of the Church upon the loyalties of the people of prairie Canada would seem to lie in a news item from a Saskatchewan hamlet. There is a debt on this church of \$2,000 and little cash in sight with which to pay it off. But the church and its farmer supporters have decided to see what can be done. The church has obtained temporary possession of 50 acres of land in the territory it serves and this has been seeded to wheat, farmers supplying the seed and performing the labor. What cash proceeds this wheat will yield will be applied on the church debt. And all the farmer members and adherents of the church will set aside a certain portion of their own lands as a "church debt" area. These tracts have been seeded, and what is realized will be turned over to the church—Regina Leader-Post.

Germany ranks first in the number of motorcars owned and operated.

Feels 50lbs. Slimmer

After Losing Only 5 lbs.

"I started taking Kruschen Salts a month ago," a young woman writes. "I have lost 5 lbs. in weight, and I feel as if I have lost 50 lbs. I am full of vigor, whereas before I was listless and worried over little things. But if my trouble was doubled, they would not worry me to-day—thanks to Kruschen." (Miss) V. P. Here's the recipe that banishes fat. Take one-half teaspoon of Kruschen Salts in a glass of hot water before breakfast.

Be sure and do this every morning, for "It's the daily dose that takes off the fat." When you take Kruschen daily it means that every particle of poisonous waste matter and harmful acids and gases are expelled from the system.

Modify your diet, and take gentle exercise. The stomach, liver, kidneys and bowels are the ones that need a salt, fresh blood containing these salts is carried to every part of the body. Then follows a feeling of "energetic health and activity that is reflected in bright eyes, clear skin, cheerful vivacity and charming figure."

Invents New Material

Belgian Major Says It Will Make Airplanes Fireproof

Major Van de Rolhem of the Belgian Army declares he has invented a material which will make airplanes fireproof. Plates of asbestos are soaked in three chemical baths and then baked at high temperatures. Tests were made recently near Brussels. To demonstrate its value documents were put into two boxes made of the new material, and these were plunged into a blazing fire for a quarter of an hour. The papers received no injury whatever. A miniature monoplane was also covered with this preparation and then soaked in gasoline and ignited. The flames burned the material without without injury to the plane. To show his confidence the major sat for 10 minutes in the pilot's seat with the plane blazing all round him. The temperature in the cabin never rose above 74 degrees.

Shined Shoes Of Prince

Veteran Bootblack Had Many Experiences In Fifty Years

Hardy Bent, of Digby, Nova Scotia, veteran bootblack, once shined the shoes of the late King Edward VII, who was then Prince of Wales, and a visitor in Toronto. He will celebrate his 78th birthday in July.

A master of his trade with more than 50 years' experience, he has put up his "old stand" in the same place for the past 35 years. When he was younger he travelled, and shoes to which he applied polish were the pride of their owners in New York, Toronto, Halifax, Saint John, and many other cities.

"Hardy Peg," as he is called, says that he has seen lean years, but looks forward to a bright future because he is drawing an old-age pension.

Movable Birthday Date

A Milwaukee man's sliding scale of birthdays brought dismissal of his application for an old age pension.

He was listed as 45 in a life insurance policy, 58 in county relief records, 66 in his marriage papers, and 70 in his own application. Seventy is the minimum age for eligibility to a pension.

If it wasn't for the help of a woman most self-made men would be out of luck.

France Thinks That Germany Is Ready To Arrange For Peace

Paris.—Germany, worried by political alliances which by slow degrees are building a China wall about her frontiers, is attempting to make its peace with France, it was believed in high French quarters here.

That is the interpretation placed on secret meetings, the last Saturday, between Louis Barthou, French foreign minister, and Joachim von Ribbentrop, Chancellor Hitler's special commissioner for disarmament.

The German embassy, it was reported, found the aged foreign minister of France stern and unyielding.

France's policy of strengthening her political alliances goes forward, with Barthou starting another swing about the continent. He expects to bring home more agreements in his portfolio.

Germany was represented as ready to make noteworthy concessions. In some quarters it was even reported that Germany is willing to return to the League of Nations and the disarmament conference if thereby she can soften the attitude of France.

But M. Barthou dashed any hopes Germany may have had to get concessions in that manner by refusing firmly to "legalize German rearmament in any event," it is reported.

Well Known In Alberta

Pilot Killed In Recent Accident Once Resided In Province

Calgary.—Clyde Holbrook, pilot of the air liner destroyed by fire after a crash in the Crowsnest, June 11, was well known to Alberta airmen, having resided for several years in this province. About 38 years of age, Holbrook had served overseas with the Royal Air Force.

Born in Minneapolis, Holbrook went to Hanna in 1916, where he enlisted in the Royal Air Force, proceeding overseas from there. He was an "ace" airman, and was shot down while over the enemy lines, being prisoner of war in Germany for two years.

May Tour Canada

Hawker Fury Planes Coming To Toronto In July

Calgary.—There is every possibility the five Hawker Fury planes of the Royal Air Force that will visit Toronto next month will make a tour of the Dominion, George Ross, executive secretary of the Canadian Flying Clubs' Association, said here.

The machines, which carry a personnel of 16, are expected to arrive at Montreal, June 20. They have been invited to attend the Calgary Stampede in July.

King Receives Delegation

London.—The King received at Buckingham Palace the delegation headed by the Duke of Uxbridge, came to London to announce formally the accession of King Leopold III, of the Belgians. His Majesty expressed sorrow in connection with the death of King Albert, having lost "not only a beloved cousin but also a personal friend."

A Serious Problem Is Now Confronting The Creditors Of Germany

Berlin.—Germany has told foreign creditors they will receive no interest for at least six months on medium and long term obligations, including the Dawes and Young loans, to the payment of which the "full faith and credit" of the Reich government was pledged.

The moratorium was not unexpected, but the announcement placed the problem of what to do about the financial condition of Germany squarely up to the creditors.

The position of Germany as outlined in a communication of the Reich bank announcing the moratorium, is that transfer of payments out of the country is impossible because of the low supply of gold and foreign exchange and that there would be no profit to anybody in devaluing the mark.

The mark, now almost wholly a national currency, has been held firmly on its "gold standard" basis, although the gold coverage has dropped below 3.7 per cent.

Economic Reprisals

Germany Promises To Retaliate If Any Move Made

Berlin.—In an official communication, with a distinctly bellicose tone, the German government announced that any economic reprisals by Great Britain for the moratorium on Young and Dawes loan will be met by quick retaliation in kind against British imports to Germany.

The communication was prompted by reports that Britain was establishing a compulsory clearing arrangement, and was regarded as a flat statement of the German policy against possible reprisals by other creditor countries as well.

Pointing out that Germany has announced readiness to enter negotiations on the moratorium question, but insisting that such negotiations will not be possible "under pressure," the communication ironically states that "the British government seems to proceed from the idea that Germany is not a very important factor in British trade."

Attention was even called to the fact that during the first quarter of this year Germany had a passive trade balance of 60,000,000 marks with the British Empire, the inference being that Germany has the advantage in a possible battle of compulsory clearings.

Bisley Team Sails

Hop To Bring Kalopore Cup Back To Canada

Montreal.—Markmen of the Bisley team, Canada's hopes to bring back to the Dominion once again the coveted Kalopore cup and the prize of His Majesty the King, were inspected here at the Victoria Rifles armory by Brigadier W. P. Giesborne, officer commanding Military District No. 4, Montreal.

The team of 18 marksmen, headed by Lieut-Col. H. F. G. Letson, of the University of British Columbia C.O.F.C., left for New York and sailed from there June 16.

Each member of the team has his favorite rifle with him and his changes have been made in equipment, apart from the replacing of the brass shoulder badge to a red silk patch bearing the word "Canada." The broad-brimmed hats will be distributed at Bisley.

Arrange To Pasture Cattle

Winnipeg.—Premier John Bracken and W. P. Davidson of St. Paul, manager of the Manitoba farm, have concluded arrangements for pasturing a large number of cattle from the southwestern Manitoba drouth area on the Davidson properties at Marchand, southeast of here.

Leave For Northern Posts

Edmonton.—Priests, Royal Canadian Mounted Police, mining men, prospectors, trappers, traders and missionaries formed the band of 100 northerners who took train for Wayways, Alta., on the first leg of journeys to sub-Arctic posts.

Increased Nickel Production

Canada's Output For April Exceeded Only Once Before

Ottawa.—Nickel, essential alloy in the production of armaments, is once more front page news.

The bureau of statistics has announced production figures for April.

The total is 12,924,418 pounds, the second greatest month in the history of production in Canada. Only once, back in November, 1929, did Canada's nickel mines exceed such volume.

In the four months ended April 30 last, production ran to 39,898,699 pounds which exceeds that of the corresponding period of 1929 by close to three million pounds. Thus 1934 is the best year since a record-breaking year in the output of a metal demanded the world over in the making of war supplies.

International Nickel, at Sudbury, the major producer in the world, enlarged its plant after the peak year of 1929 and last April brought its fourth furnace into operation. The company is now running to full capacity. So, it is reported, is Falconbridge, the other large producer in Canada.

Anyone who doubts what is afoot in world armaments factories need only scan the statistics. Canada, it must be remembered, holds a virtual monopoly on this metal.

In 1932 the output was 30,000,000 pounds. In 1933 the total zoomed upwards to 82,000,000 pounds.

And in 1934 the prospect is for a production of about 120,000,000 pounds which will be some 10,000,000 more than the peak year of 1929.

May Beat Previous Record

One Pullet Has Chance In Egg Laying Contest

Agassiz, B.C.—Only one pullet in the annual egg-laying contest at the Dominion experimental farm here has a chance to equal or better the world's record of 357 eggs in 365 days, equalled in last year's contest by the White Leghorn, Derreen 10-L.

Barred Rock pullet No. 3, owned by the Delta Land Company, Vancouver, has laid 220 eggs in 224 days to equal the performance of "Dauntless Derreen" at this time last year. Her closest competitor is Barred Rock pullet No. 2, owned by A. Pennington of Agassiz, with 212 eggs.

Pullet No. 3 has laid small eggs, however, and is far behind on points in the current contest with only 2017. Hocking No. 10, a White Leghorn, leads with 219.6 points, although she had laid only 200 eggs.

Saskatoon Man Killed

Dental Technician Had Just Started On Business Trip

Saskatoon.—Scarcely out of the city on an extended business trip which was to have taken him to the Pacific coast and through the western United States, Leo Lipkovic, dental technician, met violent death as his car skidded and overturned in the ditch. The accident occurred about 16 miles north of the city on highway No. 5.

Two other occupants of the ill-fated auto, Abe H. Handelman, and Louis Wener, explained that Lipkovic had got into difficulties when the car had skidded in loose gravel at the edge of the road. The driver had attempted to pull the vehicle onto the roadway and in so doing overturned it. Coroner A. M. Molloy, M.D., ruled no inquest was necessary.

SET NEW AIR MARK

Jean Batten, 24-year-old English girl, pictured just before she hopped off from London on her record flight to Australia. The daring ladybird hopped five days from the previous record, held by Amy Molison, whose husband taught Miss Batten to fly.

Three Indian Brothers Committed For Trial

Charged With Murder Of Two B.C. Police Officers

Merritt, B.C.—Trial of three Indian brothers, charged with the murder of Dominion Constable F. H. Giesborne on the Canford Indian reserve on or about May 24, will open at the Vernon, B.C., assizes, June 26.

Ennes, Richardson and Alex George were committed to trial by Magistrate A. G. Freeze and were removed to Okalla prison under heavy police guard.

A fourth brother accused of murder, Joseph George, was under medical care in Vancouver. He was granted a further remand until June 21.

Many bloodstained exhibits were introduced during the two-day preliminary hearing. Indian neighbors of the George brothers from the reservation and expert police investigators testified for the crown.

A cheque for \$500, the reward offered by the British Columbia government for the recovery of one of both bodies of the constables, will be turned over to "Big Frank," the Indian, who recovered Giesborne's body from the Nicola river on May 26.

No pains have been spared by police in their efforts to avenge the alleged slaying of their comrades. Soon after the constables' disappearance, Attorney-General Gordon Sloan announced "the entire resources of the crown" had been placed at the disposal of the investigators in their effort to obtain a conviction.

Heart Surgery Possible

Cleveland Surgeon Predicts Direct Operations In Near Future

Cleveland.—A new type of heart surgery, promising one avenue of escape from the present tremendous heart death rate, was proposed to the American Medical Association by Claude S. Beck, Cleveland surgeon.

He pictured surgeons in the near future operating directly upon hearts. The hearts will be patched literally, he predicted, with grafts of tissue taken from other parts of the body.

Separate Grades For Garnet Wheat Are Established At Ottawa

Ottawa.—Ending a controversy that has raged for years among wheat growers, grain traders and millers, the House of Commons placed its final approval on the amendments to the Canada Grain Act establishing separate grades for garnet wheat.

The changes went through committee speedily and received third reading.

Hon. W. R. Motherwell, former minister of agriculture, took advantage of the discussion to assail the character of the propaganda carried on against garnet wheat to bring about the change. He wondered if

there was any assurance that propaganda would not be renewed and continued with the object of achieving some other change or of forcing garnet off the map altogether.

As a member of the agricultural committee he had supported the recommendation for separate grades, said Mr. Motherwell, not because he fully approved of it but because he wanted the long controversy ended.

The new arrangement provides for two new wheat grades, Garnet No. 1 and Garnet No. 2. Garnet is wholly excluded from No. 2 Northern but may be graded as No. 3 Northern.

Case For Federal Cabinet

Vancouver.—British Columbia's case for the taking over of the Pacific Great Eastern Railway by the Dominion and her claims for better terms under confederation will probably be considered by a committee of the whole federal cabinet some time after prorogation of parliament, Premier T. D. Pattullo indicated.

Bring Down Radium Ore

Edmonton.—Two Canadian Airways pilots brought down one ton of pitchblende (radium ore) from the rich claims of E. Hargreaves at Hot Lake lake to the end of steel at Waterways, Alta., during last week.

Death Toll In Hurricane

Tegucigalpa, Honduras.—Stricken Central America received additional reports of wholesale destruction of life and property in a hurricane which struck some days ago. The known dead in the two countries was estimated at 3,600.

New Franchise Act Calls For Closed Voters' List For Twelve Months

Ottawa.—A closed voters' list that will stand for periods of 12 months and always be ready for immediate use, appointment of a franchise commissioner for all Canada and revising officers in each constituency, and machinery whereby a general election could be held within four weeks' notice, are objectives of the new Franchise Act discussed in the House of Commons.

Hon. Hugh Guthrie, minister of justice, moved the resolution on which the bill is based, described its objectives and depicted efforts which he said had been made by some newspapers to give the impression those unfamiliar with either French or English would be disfranchised. That had never been the intention of the government, he declared.

Prime Minister R. B. Bennett also regretted the use made by some portions of the press of advance information on the draft bill for the purpose mentioned by Mr. Guthrie and also to lead the public to believe the Doukhobors in Canada would be deprived of the vote. It was suggested that the Doukhobors in British Columbia, who had defied the laws, would be so treated. But that was a matter yet to be decided.

Members of the third group in parliament were incensed when it was revealed that the draft bill had been the subject of an informal conference between two members of the government, the leader of the opposition and one of his colleagues.

"One of the most disgraceful things ever known," said E. J. Garland (U.F.A., Bow River), in expressing his resentment that the third group had not been included in preliminary discussions. Robert Gardiner (U.F.A., Acadia) also expressed his belief that the government should have included his party in the conferences. The reply of both Mr. Bennett and Rt. Hon. W. L. Mackenzie King, opposition leader, was that the steps leading up to the preliminary discussions were taken in the house, and if the third group had wished to participate they could have expressed themselves at that time.

The resolution was passed after considerable debate but no great opposition to the principles of the bill was advanced.

Briefly the bill proposes to make the following changes in the present regulations:

Appoint a franchise commissioner for all Canada.

Appoint revising officers in every constituency.

Appoint one or more enumerators in every polling district, to prepare for first list.

Immediate preparation by enumerators of a voters' list for all Canada to be kept in print at Ottawa, and to be revised in 12-month periods as a closed list.

List to be completely revised every 12 months.

Voters in urban districts to accompany registration with signed statement so that signature may be compared to obviate impersonation at the polls.

The list to be geographical rather than alphabetical, or both.

There is no change in the actual machinery of conducting an election and very little in the qualifications for franchise. The main consideration being given to the list of voters.

With the proposed closed list a person who moved during the 12-month period would be entitled to vote only in the district in which he was registered at the time the list was closed.

Mr. King, while not opposing the measure, suggested that there should be two enumerators in each polling district, representative of the government party and the official opposition, and that there should be an appeal from the rulings of the revising officer. The draft act contemplates no appeal but Mr. King thought one should lie with a county court judge.

The prime minister expressed the opinion that these differences could easily be composed and prophesied that the bill, when finally presented, would contain few, if any, clauses which would prove objectionable to any party.

A HAPSBURG RETURNS TO VIENNA FROM EXILE

The first member of the royal house of Hapsburg to return to Austria from exile in 15 years, the Archduke Eugene (left), is shown in conference with Engelbert Dollfuss, Austrian dictator, soon after his arrival in Vienna. The Archduke had lived in Switzerland since the fall of the monarchy, when he refused to relinquish his imperial rights. He was greeted enthusiastically by people in Vienna.

THURSDAY, JUNE 21, 1934

NOTES AND COMMENTS

ACTIVITY of local organizations quicken the life of a town. Churches, fraternal organizations, councils and boards of trade, service clubs, all contribute to the sum total of human activities. Without them a town would be dead.

THEY merit a share of support from everyone, yet frequently appeals for co-operation are regarded with indifference. Appeals were made for the co-operation of the miners union and the business men to organize a celebration of Canada's most important national holiday—Dominion Day. Financial support was promised by those giving the largest amounts, yet indifference of the general public indicates that the significance of the day is not appreciated, despite two successful celebrations in 1932 and 1933.

A LARGE section of Coleman's population are of European birth, and traditions and national customs are firmly embedded in their memories. Yet when such a distinctive Canadian holiday as Dominion Day, commemorating the anniversary of Confederation, is permitted to pass unobserved by our own British and Canadian born people, how can we expect to instill pride of country and even our home town in the hearts and minds of people we expect to become assimilated as Canadian citizens? A splendid opportunity of developing good will among all classes of the community is allowed to pass unheeded. 'Tis a pity!

MIDSUMMER approaches, and this is the longest day of the year. Holidays are being planned. Some plan on journeys to the sea; others to inland resorts, while he who cannot stand the expense of motor or train will plan on a few days fishing at odd times in nearby streams. Each will enjoy the relaxation which a holiday brings, and even the small boy with a bent pin trying to catch fish will enjoy his experience as much as the fellow with an expensive split bamboo rod, especially if he hooks a big 'un. The advantages of living in the mountains are many.

THE TENDENCY to ignore the Sabbath by playing games at which an admission fee is disguised as a collection draws criticism. Especially is it to be condemned when during church hours the Sabbath is made noisy by the rooting of fans! Though the Sabbath was made for man, and he may spend it as he chooses, a large section of public opinion cannot be flattered without adverse results to organizations which are thoughtless in this regard.

USERS of light and water are asking for information on the renewal of the franchise with Coleman Light & Water Co. Negotiations are under way between council representatives and the company, but particulars are not available as to expected reductions or the basis of discussion between the parties concerned. By the signs and portents, it would appear that a case will be submitted to the Board of Utility Commissioners to arbitrate on, as the term of the present franchise expires on June 30.

SUBVENTION aid to bituminous mines for coal for railway purposes raises hopes for increased employment in Crows Nest Pass mines, but not to the extent that misleading headlines of daily newspapers hint. The benefit to the coal industry depends largely on the action of the C.P.R. in determining if it will be more profitable to themselves to continue to use American steam coal, which is brought in to a great extent via the Great Lakes. Dollars and cents outweigh sentiment in calculating dividend possibilities on invested capital, yet there is hope that government aid may increase tonnage for the mines of this district. But—'tis not wise to count chickens before they're hatched.

THE Men's Brotherhood does its part in trying to bring in speakers to give a wider knowledge of subjects of vital interest. If by listening to addresses people are induced to think more as individuals than in the mass, benefits result and there is greater possibility of sane judgment governing later action.

TWO salesmen sold the same goods. One's record showed much greater volume than the other. Investigation revealed the reason. One had a neat appearance, a pleasant method of approach. The other was sloppily attired and uninteresting to prospective customers. The same standards apply to stores. Some attract; others repel. Self analysis is good medicine. It reveals faults of which you may have remained unconscious.

A photograph of the International team of the Oxford Group appears on page 6 of this paper, with the names of the Groupers.

ALBERTA

Personal and Local

Miss Lempi Apponen is in hospital following an operation for appendicitis.

Ray Fredrickson spent the weekend in Claresholm, visiting his parents.

Many Colemansites attended the football game held in Fernie on Sunday evening.

Mr. and Mrs. W. Fraser, and Mr. and Mrs. Frank Vajprava motored to Lethbridge on Saturday.

Mrs. James Smith has been in hospital for the past two weeks, and is making progress.

Sid Emery left on Monday for Creston, B.C., where he will spend the summer.

Mrs. George LeRoy returned to her home in Ymir, B.C., after spending a month visiting relatives in Michel and Coleman.

Bert Westworth arose early in the morning, and went forth to fish. Just what he caught, he has not told, for Bert is very modest, and when questioned, he just smiled.

Mrs. A. Beck was welcomed by a number of friends in town on Monday, after an absence through sickness of several months at Star Creek ranch. With Mr. Beck, she plans on a visit to the coast during July, in order to fully recuperate.

Roy McLeod is a small toy, but can mount a horse two or three times his height by having the horse help him. The knowing animal puts his head to the ground, Roy clambers on his neck, and the horse gently eases him along his neck till Roy is on his back. Quite simple, and the horse just quietly "does his stuff" as if to the manner born.

Pincher Creek golf club members were the guests of Crow's Nest Golf and Country Club on Sunday, with R. F. Barnes as master of ceremonies. 16 players from Pincher were matched against local players, the home players winning the highest aggregate on the day's play. Beautiful weather prevailed, making it a very enjoyable day. Crow's Nest Pass golfers will play at Lethbridge during the coming week end.

Frank Barringham has transferred the scene of his big boxing program from Coleman to Blairmore, because he received very little encouragement here and no effort or support was forthcoming to promote a general celebration on July 2. He takes all the risk of financing these programs, and naturally is deserving of some return. Coleman loses the extra business that might accrue because of lack of energy. Even little Conley with less business houses than the fingers on two hands stages an annual celebration. Here's hoping Frank gets a good crowd.

Radio Compass Aids Canadian Shipping

Science has come to the aid of fog-bound mariners through the medium of the radio beacon or "light-house of the air". Its beam is picked up by a special receiver mounted in the chart-room, called a Radio Compass, and bearings are taken from two or more stations. The point at which the bearings intersect is the position of the ship. The advantage of position-finding by radio is that the bearings are not affected by storm or fog, as are visual bearings.

Above is shown the "George L. Eaton" of the Hall

Corporation of Canada, the first of a number of ships being equipped with a new Radio Compass, recently developed by Northern Electric Engineers to meet the particular needs of Canadian Lake and Coastal Shipping. Inset is Captain Barrett in the wheelhouse of the "Eaton". Above him is the receiver of the Radio Compass.

The sketch shows how a ship at sea takes bearings from two distant stations. At the right is the recently developed Radio Compass.

Here and There

One graduate of the Anglican Theological College of British Columbia and four undergraduates are out for a summer of adventure and color since embarking recently aboard Canadian Pacific coastal liner, "Princess Norah" for the Yukon. Her 100-odd passengers also included miners, prospectors and northern railway and steamship men going in for the season.

Portland, Oregon's 26th annual Rose Festival, world-famous for colorful pomp and pageantry, will be held June 11-14 next. The western zone of the Canadian Legion will hold its convention there as also the American Rose Society.

The Princess Elaine, popular Vancouver-Nanaimo ferry of the Canadian Pacific B.C. Coast steamship service, is back from overhaul with the very latest in lunch rooms installed aboard. It is 40 feet long and 15 feet wide, and is provided with lunch counter and tables.

General improvement in business is apparent throughout Canada although many problems still remain to be solved is the opinion of Jackson Dods, general manager of the Bank of Montreal, who sailed for Europe aboard the Empress of Australia recently.

The Canadian Pacific 42,500-ton Atlantic flag ship Empress of Britain completed her world cruise of 20,315 miles last month on arrival at New York and sailed again for Chertouche, and Southampton to be fitted for her northern season sailings between Southampton and Quebec.

An English bullock, scotch terrier, two boxes of swan's eggs and four homing pigeons were among the Canadian Pacific Express shipments arriving at Quebec recently aboard the Duchess of York from Liverpool, Belfast and Glasgow.

"With a soundly administered united system, Canada would be able to anticipate within a reasonable period of time, a balanced railway budget and would be able to finance any justifiable extensions which expanding settlement and development might in future demand," E. W. Beatty, K.C., chairman and president of the Canadian Pacific Railway, declared in a recent speech advocating satisfaction for administrative purposes of the two major railways.

WORLD HAPPENINGS
BRIEFLY TOLD

The House of Commons in committee of ways and means, approved the amendment to the gold tax moved by Hon. E. N. Rhodes, finance minister. The disarmament conference adjourned June 12, for a long "breathing space," in which governments will attempt to settle outstanding political difficulties.

Expansion of the British air force, announced some time ago, contemplates the addition of 50 squadrons, totalling roughly 600 machines, it was learned.

Fire of unknown origin destroyed the Quaker Oats elevator at Delisle, Sask. More than 9,000 bushels of grain in the house were ruined. The loss was covered by insurance.

John Duncan, veteran railway telegrapher, died recently in Toronto, aged 91. He succeeded to the job the late Thomas Alva Edison, famous inventor, held as telegrapher on the Northern Railway of Canada.

The Victoria Daily Times, first published on June 9, 1884, celebrated its golden jubilee by publishing a special anniversary edition. The paper was founded by the late John Grant, M.L.A. for Cassiar at the time.

Declared as a record without rival in book selling in South Africa, 150,000 copies of the new Afrikaans Bible have been sold in the South African Union and the Rhodesias since its issue a few months ago.

Soviet Russia's crop sowing plan for this year was 98.2 per cent. complete the first week in June. On that date 226,328,000 acres had been seeded. It is the largest area ever cultivated by the Soviet Union.

Market For Timothy Seed

Shortage In Production Is Opportunity For Western Growers

Domestic production of timothy seed in Canada is still far short of consumption, this is noted in a report of the Saskatchewan Department of Agriculture, indicating an opportunity for growers in the West. Timothy ordinarily yields from 200 to 300 pounds of seed per acre, and growers have received on an average about 6 1/2 cents per pound for the seed since No. 1 grade, over the past three years. Canada domestically about ten million pounds of timothy seed and until 1931 some nine million pounds of this was imported from the United States. Domestic production since 1931 has been greatly stimulated by educational activities and the prospect of a large domestic market. As a result, production increased from less than a million pounds to some five million pounds in 1932, but declined to about 2,700,000 pounds in 1933.

Melons Save Bank Notes

Unusual Happening In Fire At Constantine Law Courts

A few weeks ago a great fire destroyed the Law Courts at Constantine. The damage done was very heavy, but the chief concern of one official centred in a safe in which he had placed funds to the value of \$5,000. Ultimately the safe was located amid the debris, and to all appearances it was a mass of warped metal, but the door was forced, and it was found that the money placed there by the cashier could be saved. The official had placed in the safe two large melons and they had given off sufficient steam during the fire to prevent the complete destruction of the notes. Some damage had been done but the numbers of the notes were visible and the State Bank accepted them.

Appreciates The Press

It is well to know that there is at least one man in public affairs who has an appreciation of the press, says the Lethbridge Herald. This is Lord Londonderry, Secretary for Air in the British government. Speaking of the British press, he said: "We find the press men fair and helpful, sparing in their criticism and generous in their praise." This is regarding the press in the light it deserves to be regarded.

"Did any of your ancestors do things to cause posterity to remember them?" asked the haughty woman.

"I reckon they did," replied Farmer Courtneay. "My grandfather put mortgages on this place that ain't paid off yet."

England is on the verge of the greatest agricultural revival of the last fifty years.

Air Mail Across Canada

Coast-to-Coast Air Mail In 19 Hours Is Predicted

A coast-to-coast air mail service in 19 hours, travelling in aeroplanes capable of flying the sky lanes from Montreal to Vancouver at a speed of more than 200 miles an hour, is the hope of Canadian airmen.

Squadron Leader A. T. Cowley, superintendent of air regulations, when in Calgary on an inspection tour, outlined plans for the fast mail service of the future to be put in operation when economic conditions are better.

The proposed route would take a western aerial trail via Regina, Lethbridge and the Crow's Nest pass to Vancouver, making a direct mountain crossing to the coast. A branch service would be maintained from Calgary to Lethbridge.

Raining Gold

Peculiar Phenomenon Is Reported In India As Result Of Earthquake

The world may talk of gold standards and gold hoarding but in India it has been raining gold. Outlying districts in which seismic disturbances were felt recently, reported a shower of fine powdered gold and dust stories of golden clouds of dust floating low over the country side.

The secret of the color of the dust was revealed when scientists analyzed samples and discovered that the dust harbored fine particles of the precious metal. The dust clouds came as a result of the earth shocks which the scientists suggested forced into the air delicate particles from deep rock fissures.

Little Journeys In Science

RADIUM
(By Gordon H. Guest, M.A.)

In 1910 Madame Curie culminated many years of efforts, when she succeeded in isolating radium and giving to the world a new science, that of radio-activity. This French lady has since become a figure of international importance for her work in connection with radium. Of Polish origin, she began the work with her husband, Pierre Curie, a professor of physics at the Sorbonne, in Paris. To-day she still directs radium research in the Radium Institute, on the Avenue Pierre Curie, in Paris. This institute was built as a memorial to Professor Curie who died in 1906, and thirty workers carry on studies in radio activity, under the direction of Madame Curie.

Radium is taken from pitchblende, where it occurs in very small quantities. It is estimated that three tons of pitchblende, which is sometimes called uranium oxide, contain only one gram of radium. The world supply of radium is said to be about 170 grams, and the chief source of supply is in the Belgian Congo. It was at first valued at from \$100,000 to \$125,000 a gram, but with the discovery of new sources of supply it has come down to from \$60,000 to \$70,000 per gram. At the Radium Institute are two grams of the substance, one of which was procured by the Curies in their early work, and one of which was presented to Madame Curie by the women of America when she visited this continent several years ago.

Radium, however, is a long lived substance. In spite of the fact that it gives off extremely concentrated rays of heat and light, it does not diminish appreciably in volume or strength, and it is said that one gram of radium would lose half its volume by radiation in 1700 years. Through these calculations scientists have been able to do determinations on the age of the earth, through the study of radio active substances found on its surface.

Because of the extremely strong powers of penetration possessed by the rays given off by radium, it has found many uses in science and industry. Outstanding is the development of its use in the treatment of some types of cancer and of numerous skin diseases.

In industry it is used in the production of a luminous paint, familiarly seen on the faces of clocks and watches.

In recent years large deposits of pitchblende have been discovered in Canada, in the region of Great Bear Lake near the Arctic Circle, and it is expected that within the next few years this deposit will increase the world's supply of radium sufficiently to bring down the price considerably.

France will retire 80,000 of its 860,000 government employees.

An Admiralty Court

Canada Has Passed Another Constitutional Milestone

Canada passed another constitutional milestone recently when the House of Commons gave third reading to a bill designating the exchequer court of Canada as an admiralty court. Admiralty litigation has been heard for years by the exchequer court but under an Imperial Act. The 1929 conference on merchant shipping legislation reported control of admiralty courts was not in accord with the constitutional status of the Dominions as established at the 1926 Imperial conference. The bill, sponsored by Minister of Justice Hugh Guthrie, gave Canada control over admiralty courts and set forth the necessary regulations. It passed through committee stage in less than five minutes and passed the house without opposition.

An Unenviable Record

United States Leads With Total of 10,617 Murders

The lowest per centage of murders goes to the credit of Holland, with Great Britain a good second. The highest is to the discredit of Chile, but the highest total is recorded in the United States. In Chile, during 1932, the last year for which statistics are complete, there were 2,913 murders, equivalent to 61 per 10,000, or one murder every three hours. The United States show 8 1/2 per 10,000; the total is 10,617. The highest per centage in Europe goes to Belgium, with 185 murders, but Germany has the largest aggregate (1,223) though this averages only 1.88 per 10,000 of the population. In the nine countries under review the total murders amounted to no fewer than 16,108.

The Panama Canal

Building Made Possible Only Through Concessions From British

Arthur Brisbane, protesting in the Hearst papers against Great Britain's failure to pay her debt to the United States, suggests that the Panama Canal rates might well be doubled against her. But the Panama Canal was built under an international agreement whereby the rates for British and American vessels would be the same. It ought not to be forgotten that the canal, of the canal was only made possible through certain British concessions. — Toronto Mail and Empire.

Rose growing under glass has become a very important industry.

SUNDAY SCHOOL LESSON

JUNE 24

A REVIEW OF THE GOSPEL ACCORDING TO MATTHEW

Golden Text: "Of His kingdom there shall be no end." Luke 1:33.
Devotional Reading: Micah 4:1-5.

1. What does the heading "The Gospel According to Matthew" mean? 2. What do we know about Matthew from the Gospels? 3. What is the tradition in regard to him? 4. What was the earliest record of the life of Christ? 5. In what language was the Logia of Matthew written? 6. In what language were the earliest manuscripts of the Gospel According to Matthew written which has come down to us? 7. In what century were they written? 8. For whom was the Gospel According to Matthew written? 9. What special Jewish phrases does it contain, and what does their use indicate? 10. About when was the Gospel written? 11. Is Matthew a complete biography of Jesus? 12. What is the main purpose of the First Gospel? 13. How many quotations from the Old Testament has it? 14. How large a portion of Jesus' ministry does it omit? 17. How does Matthew group his material? 18. Give its general outline.

Fair Wage Schedule

New Ruling For Manitoba Applies To Private As Well As Public Works

Hon. W. R. Clubb, Manitoba minister of public works and labor, recently announced a new fair wage schedule for the province, applying for the first time to private as well as public works and containing reductions of from five to 10 per cent. from last year's rates for a large section of the building trades.

The new rates become effective June 15 and were worked out after two months' study by the fair wage board. One set of rates is for Winnipeg and territory within a 30-mile radius and another for the rest of the province.

Stone masons have been allotted two rates, 80 cents and \$1 an hour, as against last year's rate of \$1.05.

Negro Undertaker (over telephone): "Rastus, your mother-in-law just died."

Rastus: "Is you sure 'bout dat?"

Negro Undertaker: "Shall I bury her or embalm her?"

Rastus: "Don't let's take no chances, brother. Cremate her!"

Austria is discouraging the importation of foreign automobiles.

Agricultural Notes

Many Items Of Interest To The Western Farmer

The quick-freezing methods of preserving foods still presents many problems for the plant breeder and the research chemist.

The highest grade alfalfa and clover meals are associated with bright green color; those of poor quality are coarse and yellow.

The use of resistant varieties of Swedish seems to be the best way of combating club-foot disease of those turnips.

As an average of all Eastern Canada, there were by the 1931 census only 41.8 acres in crop per farm which varied from 14.3 acres in Nova Scotia to 50.1 in Ontario.

According to a survey of Eastern Canada, two-plough tractor-ploughed four times as much per day as two-horse teams, and at a cost of \$1.20 less per acre.

Experiments are under way on Pacific Coast ice is named "activated ice" to distinguish it from ordinary artificial or natural ice. Cold Storage News Letter, Dominion Department of Agriculture.

The silverfish or fish moth is becoming increasingly notorious as a household pest in Canada, particularly in urban sections of Ontario and Quebec. These moths are a special liking for artificial silk (rayon) products.

Disintegrated peat is finding an important place in the top dressing of golf courses and lawns. Its value for these purposes is greatly enhanced if it is first composted with a good loam and a small quantity of manure, and the resulting product secured.

In the Maritime provinces and Quebec mud deposits have largely been used in the past for soil enrichment. Good results as a rule followed the first applications, but it was found in many cases that there was little response from repeated and continued applications.

The gypsy moth which has cost the New England States an enormous amount of money in keeping it under control was first found in the States of Massachusetts in 1869 but it was not until 1924 that it gained an entry into Canada in spite of the efforts of the officers of the Dominion Entomological Branch.

In purchasing a fish meal, the guarantee should be carefully read, bearing in mind the desirability of a comparatively low fat content, combined with high per centages of protein and bone phosphate. If practicable, a sample should be obtained and examined as to freedom from rancidity.

Canada imports millions of pounds of dried apricots. Recent investigations at the Dominion Department of Agriculture Experimental Station at Summerland, B.C., have shown the possibility of proper varieties, cultural and processing methods which may make Canada independent of outside sources.

Soybean flour, on account of its extremely low starch content, is especially valuable for diabetic persons. The flour is being successfully used in making bread, biscuits, muffins, pastry, etc., and by reason of its composition increases the nutritive value of these products. — Soybean Bulletin, Dominion Department of Agriculture.

Employment By Forest Industries

In Normal Times Annual Wage Bill Amounted To \$250,000,000

During the five-year period 1920-30 (which may be taken as a fair sample of normal conditions in the forest) the cutting of wood in the forest and the manufacture of this wood in the lumber and related industries provided work, on a yearly basis, to 244,000 people; that is to say, if the work had been spread over the entire year that number of people would have been employed all the year. Much of the work, however, is of a seasonal nature, so that the number actually employed in these industries was much greater. The annual wage bill amounted to about \$250,000,000—over forty-two per cent of the value of the products are given out by the Forest Service, Department of the Interior, as the result of their investigation of the matter and are published in the pamphlet "Forest Facts, 1933" lately issued.

Wage strikes in Australia are increasing.

OCCASIONAL WIFE

By
EDNA ROBB WEBSTER
Author of "Joretta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla, Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for them. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. After a party at an exclusive club, where the rest of the members of the party go to a cabaret to continue the gaiety, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel. Another Camilla has gone from the studio. Avis Wirth calls and persuades Peter to accept a loan of \$1,000. Peter fishes his exhibit and asks Avis and Camilla for suggestions as to a name for it. Camilla suggests "Eager" and Avis "Inspiration". Peter adopts the latter title and Camilla heartily goes to Peter's studio for quiet and nothing of Peter and Avis follow later, and as the lights are turned on, see the statue as being shattered to pieces. Avis accuses Camilla of doing this, and Camilla, stunned by the disclosure, is hurt and horrified by the accusation, faints.

(Now Go On With The Story)

CHAPTER XLVIII.

Long silences and hollow, brief remarks, like those which fill a house where death has passed, prolonged that seemingly endless night for Camilla and Peter. They were both asleep. There was little to be said. Only their separate thoughts labored in a ceaseless turmoil and gained them nothing.

If it had been a problem to solve, a difficult decision to be made, it would have been different. But a thousand sleepless nights and thoughts of their lifetime could not efface this tragic thing that had come between them.

Camilla's tired eyes watched the windows being transformed into squares of gray patches with the approach of dawn, and the familiar objects in the room emerge from dark blobs into definite shapes. The empty turn-stand mocked her derisively and deepened her pain. For contrast, the modeled group in the window stood out sharply and proudly against the background of daylight.

If something had to happen to Peter's work, why couldn't it have been that piece which had been broken? It would have grieved her to lose it, but not like this! Over and over, she had wondered how the thing could have happened. It didn't seem possible that it could have been an accident from some natural cause. No, it appeared to be a deliberate act. But who could have hated Peter like that? It was almost funny that anyone could believe she had done it—least of all Peter.

for BURNS
Mix equal parts of Minard's cream and sweet oil, and apply to the burn. Spread on brown paper. Apply in hot steam. Before long the pain will be gone.

MINARD'S
"KING OF PAIN"
LINIMENT

W. N. U. 2051

Not if he had flirted with a dozen girls and broken her heart, could she have done so terrible a thing for revenge. No, never. She loved Peter so much that she would do anything in the world for him. Then why should she be so revengeful just because he had hurt her with his silly attentions to Avis, to whom he felt obligated for some reason? He probably exaggerated that duty in his own mind because he always was doing kind things for other people. Avis had managed somehow to make him believe he owed her his gratitude.

Camilla had known all the time that Avis' sole purpose in taking that studio across the hall had been to influence Peter in her favor. Why any woman should so exert herself to take another woman's husband, she didn't know. And wondered if, loving Peter as she did, he belonged to another, she would still make such an effort to win him. She did not know. She was fair enough to know that one never knew what one would do in another's circumstances.

No use to analyze all that now. Peter's loss was irrevocable. She would have to comfort him as he would permit her, and help him to revive his hopes and dreams. She would gently lead him back to the beginning again, like those brave figures he had portrayed in the sculpture he had made for her. Gazing at it again, its beauty and significance struck her so forcibly that she sat up quickly with a little gasp.

Peter, whose eyes had been closed but not sleeping, looked at her quickly. "Peter, I have an idea," she exclaimed, and her face brightened rapidly.

"Well," he prompted listlessly. "You must enter our immigrant group in the exhibit. Looking at it in the dim light of the room and framed in the brighter background of light from the window, I just now realized how wonderful it really is."

"If it took the judges that long to discover what it is, I might win the prize in another ten years," he mused.

"But, dear, even if you don't win, wouldn't it be better to enter something as good as that?"

"If I can't enter a piece that I believe has some chance at least, I'll stay out."

"But it would have a chance. I know it would. If for no other reason, just because it is so different from most exhibit entries. Won't you please try it?" she pleaded.

He moved his head to one side, negatively. "It's no use. Forget it. Perhaps next year—"

"Peter, you have to do it," she insisted gently. "You might even pretend that you planned to use that one all the time and were only loitering the other figure for sale."

"To protect you?" he mumbled. "Oh," she cried, wounded deeply. "Then you do believe what Avis said!"

"It isn't what I think. It's what all the other think who were here, and what they will say."

"Oh, no, Peter. I am sorry if any of them believe that I could be so cruel—but it's what you think—"

"I don't say I did," he denied bluntly. "I only said that what you suggested would protect you against what the rest might think. That would be the only reason I might enter the thing, for a blind."

He believed that she had done this cruel thing to him, and still wanted to protect her from the opinions of others. What could a man be more sure of, well, if he wanted to be so noble, let him. She was positive that his entering the group would be to his honor and credit.

FALSE TEETH

Dr. WERNET'S POWDER

Dr. Wernet's Powder holds false whites so firmly and comfortably in place for 24 hours—they actually feel natural, laugh, sing without fear of any slipping. Prescribed by world's most eminent dentists—they know it's the best—just sprinkle on. Inexpensive—any drugstore.

Important enough to consider for entry in the exhibit.

With the revival of his hopes, Avis glimpsed a faint possibility for her own, and immediately sponsored the new idea. She insisted upon serving him a hearty breakfast and then driving him to the museum with the piece of sculpture.

"Do you think I would take a chance on your tripping with your last and only hope, and breaking that?" she attempted to jest.

But his mood was not responsive. He was doing this thing more for himself than anything. Just why, he did not know. Perhaps in memory of those first hours they had had together when life and love had lavishly promised them so much, and there had been no thought of doubt and misunderstanding.

As Peter had predicted, there were more entrants than usual. Improved students competed for that privilege which would solve so many present difficulties for them, as well as others who sought the distinction and various advantages which the winning of such a prize would tender them. And, as he had expected, nude figures in innumerable symbolic poses predominated. In fact, there were few who had ventured anything else.

There were a number of weird tortures after the modern vogue, a few busts of prominent or historic characters, some animal and bird presentations. Fountains and garden pieces constituted the artistic majority, and Peter watched mightily that his youthful figure was added to their number. He might have had a chance, then. It had been good better than many of them, and he believed it might have compared with the best of them.

He obstinately declined to accept Avis' suggestion that they use the sculpture after a matinee and do something to take his mind from his work, and wandered about aimlessly for awhile before he returned to the studio and the suspense of awaiting the outcome. That suspense did not concern him so much now, but he was anxious to know whom his own misfortune might have favored.

(To Be Continued)

Have Seadog For Pet

Boys In St. John, N.B., Planning To Get Seadog For Pet

Two boys who caught a seadog on the Bay of Fundy shore at West Saint John, New Brunswick, are wondering if it is really a white elephant. The young amphibian knows when to expect food, and three times a day, just before meal hour, it starts the neighbourhood with strange barking. Then the boys have to go fishing to satisfy their captive's appetite. They also feed him milk through a nipple on a baby's bottle.

After keeping the seadog in a garage for one day the boys returned it to the water and watched it swim away. Early the next morning, however, it was waiting for them on the beach below their house and followed them home like an affectionate, although awkward dog. Sometimes it goes swimming following the family rowboat, but never deserts its new pals.

The friendly canine canine, which enjoys frequent baths in a tub near the garage, is about three feet long and has a head resembling the ordinary dog. Dragging the hind flippers, it can walk almost as fast as its human companions. Since the pet refuses to go away, the boys are planning to teach him tricks.

A preacher in New Jersey, as he looked over his large congregation on Easter Sunday morning, said: "I realize that there are many here who will not be with us again until next Easter time. I take this opportunity of wishing them a Merry Christmas."

The newest paper cups for picnics have handles.

Ask Mother—She Knows

Mother took this medicine before and after the babies came. It gave her more strength and energy when she was very weak and rundown. Keep her on the job all through the Change. No wonder she recommends it.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

A Marvel Of Architecture

Palace of Arts in Mexico City Cost Ten Million Dollars

Many people look upon Mexicans as a somewhat barbaric people. Like Soviet Russia it is a country of periodical disturbances, but, like the Russians, they are intensely devoted to art, music and the theatre, and in the cities there is a far higher level of culture than in almost any English-speaking country.

After 30 years, the Palace of Arts in Mexico City has just been completed. The building was begun in 1904 during the regime of Porfirio Diaz, and despite frequent political changes each succeeding government has continued the work. There was never any difference of opinion about that. The Palace of Arts is a stupendous structure, housing art galleries, a national museum, a gigantic theatre which is a work of art in itself and the auditorium of which has the most wonderful lighting system ever conceived, an auditorium for concerts, rooms for exhibits, lectures and various other purposes. The building is a marvel of architecture inside and out, covers two city blocks, and cost about \$10,000,000.

Neither Great Britain, Canada nor the United States could or would duplicate such a monument to the arts.—St. Thomas Times-Journal.

Women Detectives Fail

To Be Disbanded In London After Six Months' Trial

Women detectives are a failure. Given a six months' trial in detective work, women members of the London police force have brought little beyond their inborn intuitive instinct to their work.

According to the Policewomen's Review they have been found wanting in many other capacities which in this line of police work, and are to be disbanded.

In an outspoken editorial on their failure the Review states: "The women who wish to qualify as detectives are always quite certain of their own capacity and are often unwilling to admit the absolute necessity of training to aid their instinct."

"The average woman is by nature entirely opposed to detective work and we see in this choice a safe-guard against a guarantee that her contribution to police work must be along different lines to those of men."

"We know ourselves unable to consider the disbanding of the women detectives as disastrous."

THE RHYMING OPTIMIST

By Aline Michaels

NEW POETS

We know the songs old poets all have made,
How they have painted life's divinest things.
To words so splendid, now words are as shade.

In suns to fleet to soaring wings,
We know how futile any phrase must be
Which follows after perfect speech to men.
Our poems are as moths tossed out to sea.

While theirs are strong gulls wheeling overhead,
In spite of this, who can from song
When it is passion of his every hour?
When through his veins is poured the lyric strain
Who can keep silence and renounce his power?

We know old poets sing sublimely well,
Yet each new heart has its own tale to tell!

More British Films

English Film Industry Has Greatly Increased Output

The English film industry has quadrupled its production in the past few years, it was revealed recently, and the report pointed out that the quality of the films has led England's movie houses to show twice as many British films as the law requires.

The "boom" in English films has led to a production of an average of 10 films per week, or some 200 for 1934, if the present pace is maintained, as against the former annual average of 50 to 60.

In Canada the distillery industry provides the largest industrial output for surplus use. Small amounts are used for human food products while a considerable proportion is fed or otherwise consumed on farms.

Under the hog grading regulations, no carcass grading is authorized at an abattoir until scales and equipment for grading have been approved by the Dominion Minister of Agriculture.

Almost Instant Relief From Neuralgia

For Quick Relief Say ASPIRIN When You Buy

Now comes amazingly quick relief from headache, rheumatism, neuralgia, etc., the fastest safe relief, it is said, yet discovered.

These results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amassing space of two seconds after touching moisture. And hence to start "taking hold" of pain a few minutes after taking. The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly you swallow it. And this is ready to go to work almost instantly.

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN's quick relief, be sure the name Bayer in the form of a cross is on every tablet of Aspirin.

Does Not Harm the Heart

Prairie Fruit Orchards

Scientific Fruit Breeding Of Great Assistance To West

The scientist is coming to the aid of the prairie settler in enlarging the variety and increasing the volume of home-grown fruits for his table. The work of the scientist in other fields of agricultural production is, of course, already widely recognized. Marquis wheat, originated by Dr. Saunders at the Canadian Government Experimental Farm at Ottawa, which combined adaptation to a short season with high milling qualities, has literally rolled the map of agricultural areas northward. More recent scientific achievements seem likely to master the wheat scourge known as rust. While these and similar developments have occupied public attention, persistent and successful work has been carried on in adapting or creating varieties of fruit suitable to the prairie soil and climate. It is now predicted that if scientific fruit breeding continues at the present rate of progress, within the next twenty years the Western prairies will have a range of fruits approximately equal in quality to those now grown in the principal fruit-growing areas of Canada.

In their natural condition the Canadian prairies produce wild fruits in considerable variety. The delicious strawberry is native to very large areas. Raspberries, gooseberries, currants, cranberries, saskatoons and plums grow wild in many localities. Apples were introduced many years ago and varieties have been developed which do well under prairie conditions. Already any farmer who can grow wheat can have a considerable variety of fruit, and with scientific fruit breeding it is predicted that this variety will be increased.

Trophy In Dublin Museum

One Of Last Scalps Taken By Manitoba Sarsce

A black tuft of hair lifted from the head of a Gros Ventre prior by a Sarsce Indian brave and one of the last scalps taken by Manitoba's dusky aborigines, rests under a glass case in the Dublin museum to-day, a concrete reminder to Irishmen that the Canadian west was once wild and woody.

Ex-Mounted Police Constable Frank Dobbs, Shoal Lake pioneer, purchased the scalp in 1879 from Sarsce Indians of the Lizard Point reserve. He met them returning from their last brush with the Gros Ventres, an American band, and bought the scalp for a sack of flour. Afterwards, while visiting his home in Ireland, he presented the trophy to the Dublin museum.

A Farmers' Journal

After 40 years of publication exclusively as a farmers' journal, The Weekly Sun, formerly The Farmers' Sun, will become an urban weekly with a rural edition, it was announced at Toronto. The paper has been taken over by Graham Spry, vice-president of the Ontario Council of the Commonwealth Co-operative Federation.

The Alps are believed to have risen from a seaway four to seven times their present width.

Little Helps For This Week

"Serve Him with a perfect heart and a willing mind." 1 Chronicles 28:9.

Let not soft slumber close your eyes. Before you've recollected thrice The train of action through the day: Where have my feet chosen out their way? What have I learned where'er I've been?

From all I've heard, from all I've seen? What have I more than that's worth the knowing? What have I done that's worth the doing? What have I sought that I should shun? What duty have I left undone, Or into what new follies run? These self-inquiries are the road That lead to virtue and to God.—Dr. Isaac Watts.

Little things come daily and hourly within our reach, and they are not less calculated to set forward our growth in holiness than are the greater occasions which occur but rarely. Moreover fidelity in trifles, and an earnest seeking to please God in little matters, are a test of real devotion and love. Let your aim be to please our dear Lord perfectly in little things, and to attain a child-like simplicity and dependence.—Jean Nicolas Grou.

First Weather Forecast

Admiral Fitzroy Evolved System Seventy-Three Years Ago

The first official storm warning was printed by daily papers just seventy-three years ago. And how the scoffers scoffed when it proved accurate! The official responsible for such a daring commitment was Admiral Fitzroy, who, as first director of the Meteorological Department, then under the control of Board of Trade, deserves to be remembered as the father of the weather forecast.

He evolved the system of collecting and collating reports from a number of scattered sources. Where as the modern forecaster is kept in touch with conditions all over the world, he received but five reports from abroad, and these were usually a day or two late! Fitzroy came to an untimely end; overwork drove him to suicide in April, 1865. He left behind him a mass of valuable data on weather observations at sea.

Deadly snake venom has been found useful in the treatment of several diseases.

Mentally, some men and women never grow old, no matter how many years they have to their credit.

Personal and Local

The city that does not seek something better than it now has is going to lose out.

George Neil has built a comfortable log cottage at Crown Neck Lake, to be used as a summer residence.

Mrs. James Davey of Macleod was the guest of Mr. and Mrs. Robt. Holmes last week.

Sheets of white blotting paper, size 19x24 for desk tops or pads, 10c each or 75c per dozen sheets. Journal office.

Noticed Jimmy Taylor riding past in an automobile with a broad smile, on his way to spend the week end at Hillcrest.

Coleman Red Sox were defeated by an overwhelming score at the hands of the Bellevue nine on Monday.

The four Alberta football teams in the Pass have announced their intention of competing in the Blairmore football competition on July 2.

\$22 was collected at the Douglas meeting on Monday evening for the speakers. The hall rent and printing expense was met by funds collected by the Men's Brotherhood.

Those intending to be present at the supper on Tuesday at 6:30 p.m. in the United church club room, should notify W. Antrolus, secretary of the Men's Brotherhood, or purchase tickets in advance, 50c.

George Chahley has been visiting at his old home at Grand Forks, B. C. It is reported there is quite a gold rush on there, and while the mayor was out staking a claim some miles from town, another prospector was driving a stake in the mayor's back garden.

Four lady anglers—Mesdames Morrison, J.A. McLeod, J. McFife and W.S. Purvis, proved themselves better fishermen than the men on Friday last, when they made a nice catch in the vicinity of Burnis. And there are lots more fish yet to be caught.

Propagandist newspapers for any cause do not give unbiased news reports, yet criticize what they term the "Capitalist" press. The press which they deride is the only reliable medium whereby the facts are published, whereas newspapers published by political organizations tell only their own side of the story and color their news reports to suit their own policies.

Mrs. Cornett visited at Pincher Creek over the week-end and attended the 50th anniversary of St. John's Anglican church. Having been a resident there several years ago, where her marriage took place, she naturally was keenly interested in the anniversary service, which were attended by people from many parts of the province, and at which the Bishop of Calgary presided.

St. John's Anglican church at Pincher Creek celebrated its 50th anniversary on Sunday and Monday when the Bishop of Calgary, Rt. Rev. L. Ralph Sherman officiated at the services. It is the oldest Anglican church in southern Alberta, being established when Pincher Creek was a mounted police post. Rev. and Mrs. A.S. Partington attended the anniversary dinner on Monday. Rev. W.R. Jeffcott is the present priest in charge.

Miss Mary Haman, bride elect of July, was the guest of honor at a miscellaneous shower given by Mrs. F.B. Van Duzee and Mrs. J.R. Atkinson at the home of Mrs. George Hope on Monday evening. During the evening whist was enjoyed, the prize winners being Miss Muriel Jackson and Miss Jean Pattinson. The guest of honor was the recipient of many beautiful gifts presented to her in a nice old fashioned slipper.

The vestry of St. Alban's church held a meeting on Sunday to discuss raising finances to pay overdue liabilities and to arrange for building a kitchen at the parish hall. W. Williams and F.G. Creighton were appointed as a committee to proceed with a plan to raise approximately \$300. The ladies guild have part of the cost of the kitchen. The labor will be furnished by the young men of the church, such as excavating and preparing the site.

Cruickshank to Speak Here

G. E. Cruickshank, M.L.A., will address the Men's Brotherhood next Tuesday evening in the church club room at 8 p.m. This is his first public appearance here and he will give a review of the work carried on in the legislature during the last session. All interested are cordially invited to attend.

A supper will be served at 6:30 p.m. to which the men of the town are cordially invited.

COLEMAN HOMING SOCIETY

M. Taron	623.5 yds

Prizes donated by Wm. Bell and J. O. C. McDonald.

Coleman Gains Victory

(Continued from Page 1)
Ferne hit back with a strong attack and a few minutes later, Bennett came rushing towards Ford with the ball. Both players collided and the ball rolled free towards the goal where Burrell came rushing in to back heel it when only a foot from the goal line to save a certain goal. Ferne were unlucky not to score and to Burrell goes the credit for saving his team at a critical time. The first half ended 1-0 for Coleman.

The second half saw Ferne try strenuously to equalize but Ford was playing a spectacular game and was blocking them at every turn. As Ferne increased the pressure Coleman half backs fell back and completely smothered the defence, so much so that for a short time Ferne were practically getting free shots on goal. Pressure was finally relieved by kicking out of the field, much to the disgust of the Ferne fans. Coleman forwards finally came into their own and Oakley was called upon to save some shots. Oakley was a little unsteady in goal and on one occasion let a slow grounder pass over his arms and just barely miss the goal.

A short time later Edwards' ankle came out causing him to leave the field but he was able to resume play some minutes later. Coleman were more dangerous around goal than Ferne at this time but even so failed to score, the final whistle blowing with the teams Ferne 0 Coleman 1.

Line up
Ferne; Oakley, P. Corrigan, H. Corrigan, Stewart, Coughlan, Maio Sweeney, F. Hughes, Bennett, J. Hughes, George.

Coleman; Ford, Griffiths Burrell Gardiner, J. Anderson, Park, Fraser Beddington, Edwards, Jock Anderson, Brown.

Referee; H. Japon

The Journal is taken home and read by every member of the family. You do not see copies of the local paper lying around post-office floors or other places such as you notice through away-sheets and other forms of advertising which do not make a forceful appeal.
